## **DETAILED ACTION**

### ***Claim Rejections - 35 USC § 102***

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-5 and 15-19 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Bernstein et al. (US 2001/0039640). Figs. 1 and 2. [0005], [0008], [0009].

For example, the '640 reference discloses a voltage supply structure [0009] for an integrated circuit, the integrated circuit comprising one or more logic trees having a plurality of logic paths [i.e. paths at step 201], each logic path having an associated delay at a particular voltage level [step 202], characterized in that the voltage supply structure is partitioned such that the voltage level supplied to a particular logic path is predetermined according to the delay of that logic path [0011].

### ***Allowable Subject Matter***

3. Claims 6-14 and 20-28 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

***Conclusion***

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
